ACADAMIC PROJECT

Mobile Application Development on ZOO GUIDE using QR CODE

PROJECT DESCRIPTION

World is in our hands today! Behind the doors, it is the technology which rules. Growing technological changes tend humans to take up the developed technologies. One among them is Quick Response Code (QR CODE).QR code is a 2-D matrix barcode which is the most fascinating way to digitally connect people to the internet via mobile phones, since mobile phones have become the basic necessity to everyone. In this project, we promote the utilization of QR code for fetching information about different animal species in the Zoological

Park. QR reader in the mobile phones are used to detect the QR code of the animal and the relevant animal's information is displayed. It also navigates the shortest route to optimize the site coverage within the simulated time .This model will be more efficient , effective to use and it is eco-friendly.

STRENGTHS

- Hard working
- Leadership quality
- Adaptive to challenging technology
- Dedication towards work
- Quick learner
- Disciplined

PERSONAL DETAILS
